

STEP 7:

Push ribbons inside the mask layers, and let each end poke out about 2cm. Sew across one end, and tack the ribbons in the other end.

STEP 8:

Turn the mask the right way round using the gap you left in step 7. Sew across the gap.

MODS:

Try on the lining during step 2. See if you need to reduce the curve to better fit your face.

Line in a contrast colour so you can easily tell if your mask is inside out.

Make several, wash frequently, handle by ribbons only.
